OrasiLabs

Delivering Hands-on Software Training Experiences

Software Application Training Made Simple

OrasiLabs empowers organizations to train anyone, anywhere on software applications. The cloud-based virtual training platform combines the best of technology to deliver a flexible, interactive learning and training experience. The easy-to-deploy and easy-to-access virtual lab environment takes training to the next level – saving time, reducing overhead costs, and automating processes to streamline the delivery of application training for employees, customers, and partners worldwide.

OrasiLabs Makes It Easy To:

Deploy hands-on, interactive software training anywhere through a cloud-based virtual platform

Reach more customers, partners, and employees

Enable flexibility, agility, and scalability in software application training

Remove barriers and drive software adoption

Improve and accelerate onboarding for new customers, partners, and employees

Increase knowledge retention with impactful training

Reduce time-to-value for product demonstrations and evaluations

Provide a secure software environment for training

Reduce costs and increase ROI

Expand training offerings and drive additional training revenue streams

Experience the Next Generation of Cloud-based Hands-on Training Labs

With OrasiLabs, you get:

| An agile solution to meet elastic training needs | Easy deployment with low human resource/IT requirements | A user-friendly interface for learners and trainers | Interoperability with key collaboration and learning software systems | A highly secure and scalable software environment |

Empower Learners and Trainers through Hands-on Lab Environments

Flexible Solutions

- Cloud-native, elastic environments with reusable templates
- Choose between live instructor-led or on-demand virtual training
- Scalable platform to accommodate organizations of any size
- Configurable policies, communication, and delivery to meet business needs
- Interoperability with key collaboration and learning software systems

Collaborative and User-Friendly

- An all-in-one platform with integrated real-time conferencing and simple, intuitive interface for course delivery
- Student-friendly set-up and access to hands-on activities for gaining real-world experience
- Interaction and collaboration between instructors and students with picture-in-picture views
- "Over-the-shoulder" views for instructors to take control of student machines as needed

Easy to Implement, Easy to Use

- 100% SaaS-based solution that can be set up in a matter of minutes
- Tap into the power of AWS cloud without the complexity
- Only a browser is needed to access, set-up, and run a custom virtual hands-on training lab environment
- Self-service access, with the option to leverage OrasiLabs' AWS account, or use your own

Maximize the Virtual Software Application Training and Learning Experience

Instructor-led Training | Self-paced Learning | Hands-on Workshops | Group Seminars
